

**WHAT IS CLAIMED IS:**

1. An apparatus, comprising:
- (a) a filter body dimensioned to fit within an inlet and forming a trough obstructing at least a portion of said inlet;
  - 5 (b) a filter body support dimensioned and adapted to cooperatively engage with said inlet and with said filter body to substantially maintain said filter body in a pre-selected shape and position within said inlet; and
  - (c) one or more connectors removably connecting said filter body to said filter body support.
- 10 2. The apparatus of Claim 1 wherein said filter body forms a trough along at least a portion of one wall of said inlet.
3. The apparatus of Claim 1 wherein said filter body forms a trough around the perimeter of the inside wall of said inlet.
4. The apparatus of Claim 1 further comprising one or more adsorbent pouches removably connected to the interior of said filter body.
